

# Hassun Tilers

## Company Portfolio

### Company History:

Hassun Tilers is owner operated and has been in existence since 1987. We began work in the private home sector, by providing our clients with high quality tiling work that they can trust. We used the knowledge gained over the years to diversify and offer a wider range of services to cater for our clients' needs such as laminate flooring and complete revamps. To date we provide complete home renovations and are in the position to consult with clients and advise them accordingly to make rational decisions with regards to materials used, designs, layouts etc. In 2006 we decided to move into the corporate sector where we could offer all our services to cooperates, giving them competitive rates without compromising quality. We currently employ a skilled team of workman that allow us to continue in our corporate venture while still being able to serve the private market.

### About Us:

In this modern age we understand the importance of keeping abreast with the latest trends and products out there. Although tiling is our backbone we have grown and remain competitive by being able to provide a host of other services. We are loyal to our clients and serve them to the best of our abilities by being professional and meticulous in the work that we do. Every job is set out, monitored and inspected by the owner to ensure quality before hand over to the client.

### Mission Statement:

Our mission is to provide quality work to every client whilst minimising cost to allow us to charge the best possible rates in order to make a profit whilst being able to create jobs and empower individuals with a profession and set of skill.

### Company Vision:

To be the service provider of choice to everyone.
